

# PacketMAX™: 1G Advanced Aggregator

1G/10G | 1U Chassis | 52 Port | Filtering, Aggregating and Load Balancing

The PacketMAX™: 1G Advanced Aggregator is a network aggregator, designed for use in branch locations or at the network edge. The system can be used to optimize port utilization of existing infrastructure, or as a stand alone device in L2-L4 filtering applications. In branch applications the system can filter and tunnel traffic to a central location for processing.

There are no additional per-port license fees, and it is compatible with MSA compliant SFP+ pluggables/transceivers.

## Key Features •
